ABOUT

Program:

The Latino Museum Studies Program (LMSP) provides a national forum for graduate students to share, explore and discuss the representation and interpretation of Latino cultures in the context of the American experience.

Smithsonian Latino Center:

The Smithsonian Latino Center was created in 1997 to enable and promote Latino presence within the Smithsonian. Twenty years later, the Center continues with its core mission, collaborating with the institution's museums and research centers to ensure that the contributions of the Latino community in the arts, history, national culture and scientific achievement are explored, presented, celebrated and preserved. We support research, exhibitions, public and educational programs, web-based content and virtual platforms, collections and archives, and publications. We also manage leadership and professional development programs for Latino youth, emerging scholars and museum professionals.
